

SYMPOSIUM

Innovations in Nuclear Medicine
In precision therapy, nuclear medicine is now able to change the lives of hundreds of thousands of patients.

SYMPOSIUM
with LUNCHBOX

Friday, May 11
12:00 - 12:45
room 5AB

Professor Giovanella, Clinical Director
Center for Diagnosis & Therapy of Thyroid
Disease, Ente Ospedaliero Cantonale
(EOC), Switzerland.

Echotherapy – robotic ultrasound therapy
for thyroid nodules - the non-invasive
alternative to surgery.

Sponsored by Siemens and TheracLion.

THERACLION

Meet us Friday from 11:30 to 15:00, room 5AB

ECHOTHERAPY technology for non invasive surgery using therapeutic ultrasound

Echotherapy is an **alternative to surgery** and to minimally-invasive techniques, enabling a 100% non-invasive treatment of patients with benign **thyroid nodules** or **breast tumors**.

The Echopulse®, a unique robot-based system, combining **ultrasound imaging and therapy**, enables:

- accurate treatment of tumors
- monitoring in **real time**
- **ambulatory** treatments
- **patient satisfaction** (no cuts, no scars)
- low risk and **cost effective** therapy.
